We Carry a Complete Stock of Dependable Radio and Electrical Supplies

Dependable Merchandise

We carry a complete line of Standard Electrical and Radio Equipment from America's Greatest Manufacturers.

This assures you of Reliable and Dependable Merchandise, the Backbone of any Business. Your orders will receive prompt attention, and we offer you the fullest co-operation in every respect.

Prices

Prices found in this catalog are revised to agree with the market at the time of issue. It is understood that they are subject to change without notice. However, no customer need hesitate in placing orders, as he will be given the benefit of any decline, also will be notified of any substantial advance before his orders are filled.

Orders

When possible, we have placed opposite each article a list number. When ordering material, kindly order by the list number and give a description of the article required.

TERMS—Standard.

You are requested to specify the routing over which you prefer shipments to be made. In the absence of specific instructions, we shall use our best judgment in selecting the route, but we are not responsible for extra drayage expenses at destination.

Returned Goods

To save transportation charges, and to facilitate the handling of goods upon receipt, you are requested not to return goods without having obtained shipping instructions from us.

This price list gives you ready information on a general line of electrical supplies and household appliances. If additional descriptive information is required on any items shown, it will be gladly furnished at your request.

This price list is furnished for your convenience in estimating your costs on prospective work, in addition to making it easy for you to order merchandise from us.

Should you be interested in purchasing material not listed in this catalog, just call upon us, as we are in position to serve your requirements for almost anything electrical.

THE PORTABLE

Physical Fitness with a
"Jack Sprat"
THE SENSATIONAL
EXERCISER-REDUCER

Fifteen Minutes a Day for—

**The Joy of RADIANT
HEALTH and BEAUTY**

Surplus Weight Safely Removed

The smooth flow of vibrations of the "Jack Sprat" provides a safe, positive method of destroying fat. Conversely, if you are underweight the coursing vibrations will strengthen undernourished muscles and improve circulation. The gently massaging action of the "Jack Sprat" stimulates the internal organs, being particularly beneficial in correcting intestinal stagnation.

Keep Yourself Fit

Every successful man and woman knows the secret of being physically fit. Mental alertness, energy and a well balanced figure are the results of exercise—daily and properly administered.

The "Jack Sprat" appeals to all the family as it combines the physical benefits of swimming, riding, rowing, tennis, golf and other sports. It is the most sensible and the simplest builder of health.

The "Jack Sprat" is an exerciser — reducer — and masseur, all in one! A few minutes a day with this wonderful health builder will reward you with glowing vitality, strengthened muscles and a lithe, supple figure.

"Jack Sprat"

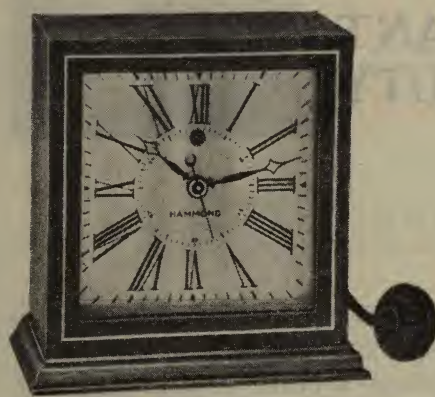

This sensational Exerciser and Reducer sets on desk, table or chair,—for it is furnished with or without pedestal. Five stroke variations, ranging from the mildest to the most vigorous form of body massage. Scientific in construction, convenient to operate—no exposed pulleys or pulley belts. The entire mechanism is completely enclosed. Finished in beautiful two-tone green enamel — complete with anchor strap and rod, and vibrating strap.

Naval Observatory Time By Electricity From the Light Socket With the Hammond Synchronous Clock

A NECESSITY IN EVERY MODERN
HOME—A SPLENDID GIFT

PORTABLE MANTEL TYPE

Mounted in finely finished, close-grained mahogany case. Approximately 5" wide, 6" high. Engraved dial. Provided with cord for connection to light socket. Colonial model as illustrated.

List price \$14.50

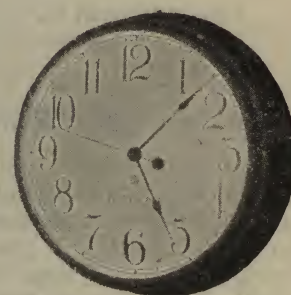

Net price 8.70

Not a luxury or a novelty. Hammond Clocks are staple, salable merchandise.

How the Hammond Synchronous Clock Operates—In the Hammond Clock is a tiny iron disc which is revolved by an electro-magnet connected to the lighting circuit. Electric impulses come over the wire and these are precisely timed by elaborate master clocks in central stations. Each impulse advances the clock by a small fraction of a second. Variation in voltage from house to house makes no difference whatever in the rate, because these

A completely electric clock—operated by electricity from the lighting socket—regulated and kept in perfect time by this same electricity. Never requires winding—indicator on dial shows if clock is operating correctly. *It warns you if it is wrong.*

In this one instrument is combined the beauty and distinction of a graceful clock with a degree of utility never before possessed by clocks in the home. This is the ability to bring Naval Observatory time. The Hammond Clock contains no springs or similar mechanism. It is driven by electricity and constantly regulated by electricity to maintain absolutely accurate time. Once connected to the electric system, which is accomplished by plugging into any light socket, it requires no attention. Requires no winding—no regulation. It never requires oiling and the electricity used is negligible. You can rely upon its accuracy because it carries on its dial a continuous indicator which tells at a glance if the clock has gained or lost more than 10 seconds.

WALL TYPE

Round. Finished in white enamel for hospitals, kitchens, etc., or mahogany for offices, etc. 10" face. 12" over all diameter. 4" thick.

List price \$22.50

Net price 13.50

Keep these Clocks on your counter — in your window. They are easy to sell.

impulses are independent of voltage. The impulses being sent out over the wires are varied slightly from time to time by the regulation at the central station so that the Hammond Clock, as well as a master clock at the station, will check exactly with the U. S. Naval Observatory time which is received at the station direct by wire from observatory at Washington, D. C.

Light and heat, even refrigeration, is delivered to the home over the electric light wires—now, correctly regulated time can be delivered in the same manner with the Hammond Synchronous Clock

SEASONABLE SPECIALS

Presto Spray Gun

(All Electric — High Pressure)

FOR PAINTS, VARNISHES AND LACQUERS.

The PRESTO Spray Gun is an ALL-ELECTRIC Paint Gun complete with motor-driven air compressor, spray nozzle and container, all in one unit. Adjustable nozzle to suit different sizes of work. Easy to handle and simple to operate. Weighs but 5 pounds.

Operates on either direct or alternating current. Air-cooled, protected by fire screen.

Attach container holding color to be used. Plug in most convenient electric light socket. Hold it like a gun, 6" to 8" from article to be sprayed. Pull trigger switch in pistol grip handle, and start painting or lacquering. Equipped with 20 feet of Type SJ Rubber Sheathed Cord.

"That's all there is to it!"

Saves Labor, Time, Space, Paint. Costs Less.

The PRESTO Spray Gun is a high pressure electric spray gun with self-contained motor driven air compressor—highly efficient—and should not be confused with fan type sprayers which give a comparatively low pressure. PRESTO equipment is as near perfect as possible in workmanship, design and material and is guaranteed against any defects in same.

Levolier Switches

50 Twilight Canopy Switch

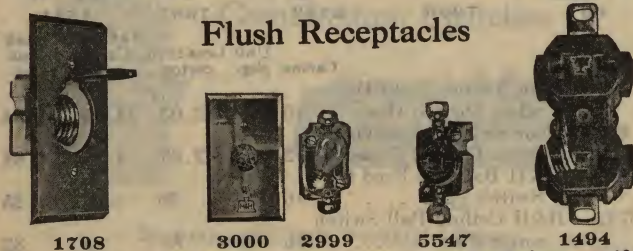

50 Twilight Canopy Switch 10 100 \$70.00 \$60.00 \$50.00
 The Levolier Twi-Lite Switch gives the user the benefit of having FULL BRILLIANCY and a SUBDUED LIGHT EFFECT from the one control without forcing them to make their fixtures look ugly by having one-half or less of the lamps burning.

First turn, Bright; second turn, Dim; third turn, Out. When dim, current consumption is but one-third and gives one-seventh the light.

59 Link Switch 10 100 \$51.00 \$48.50 \$46.20
 Here is a companion to our No. 61 Conduit Box and Fixture Switch to be used between two links of chain on lighting units having small canopies. Resembles a link of chain. Takes the place of the "Sore Thumb" and pendant switch and is a lot less expensive in original cost and installing. No extra wire needed. To assemble, hook the link on, cut one wire, connect to terminals of switch, slide switch through hole in link, drop down the clasp and you're done.

61 Fixture Switch 10 100 \$51.00 \$48.50 \$46.20

Square D Switches

Service Entrance Switches

The Square D Entrance Switch is mounted on a porcelain base and enclosed in a steel cabinet. The door can be locked or sealed shut and the handle can be locked "off" by means of a padlock.

Plenty of knockouts and ample wiring space make it easy to install. The 99000 line of entrance switches have removable ends, which permit the use of Square D meter trims.

Single Throw, Fused, 46000 Type

No. 46352

46000 Type Switches are intended for use as entrance switches, disconnects or for any installation demanding infrequent operation. The switches have the good Square D finish. They are designed and built not cheaply, but well. The fact that infrequent operation does not require the same unusual strength of design found in the 80000 series and the 90000 series, makes it possible to produce the new 46000 line at a lower cost.

Quick Break, Single Throw, Unfused, 90000 Series

Individual base construction makes it possible to remove any switch parts from the front of the switch in a few minutes' time.

Plenty of knockouts and wiring space is provided so that the switch can be wired up easily and quickly.

Automatic Starter

For Across-the-Line Application on A.C. Service.

This Square D Starter is furnished with one push button station, which can be conveniently located.

Protects motor against Overloads, Low Voltage and Burn Outs due to Single Phase operations.

Built for heavy duty and severe operating conditions on A.C. service. It provides low voltage protection on 3-wire control and entirely eliminates burn outs through phase failure. By adjusting a small lever this Starter can be used for hand or automatic reset as desired. By the changing of heating relay elements this Starter can be adapted to any size motor, ranging from 1/4 to 10 h.p. in a few moments time.

Starter Rating on

3-Phase Motors

On 220 Volt—up to 10 h.p.

Starter Rating on

Single Phase Motors

On 220 Volt—up to 5 h.p.

No. 72352 Complete,	
with one push button station.....	\$20.40 net
No. 70151 Extra push button stations.....	\$1.70 ea. net

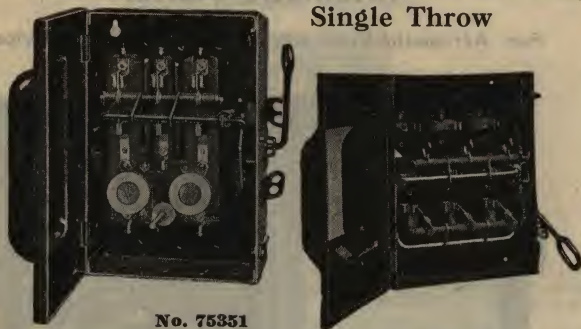

When ordering Starters please specify horsepower, voltage, phases and other features of motor.

Cabinet Supported Fuse Blocks

TAKE STANDARDIZED DISCOUNTS. SEE PAGE 20.

The Cabinet Supported Fuse Block is a double pole cut-out for Edison plug fuses. It provides accessible branch fuses and fits into the U-shaped twistout openings in the side of the standardized cabinet. Each switch may be fitted with one or two fuse blocks. The cover of the Square D block is kept closed by means of a spring.

1021	30	2	125	10	\$1.55

**Quick Make and Quick Break Motor Starters,
Single Throw**

No. 75351

The motor starter is operated exactly as any ordinary switch. Merely throw the lever upward to start the motor. On releasing the lever, the switch automatically takes the running position. The running fuses are shunted by the use of a set of auxiliary blades during the starting period. The circuit is not opened in going from the starting to the running position.

Pulling the lever downward stops the motor.

Cover Control

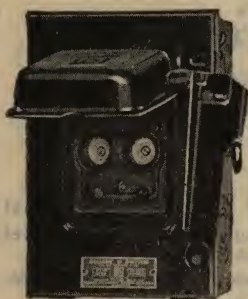

Cover cannot be opened when the switch is "on." The switch cannot be thrown "on" when cover is open except by authorized person having a Square D key (Cat. No. 70,000).

Crouse Hinds Floodlight Projectors

Crystal Glass Reflectors with either smooth or hammered surface.

Mounting—Steel trunion on cast iron base.

Focusing Mechanism—One way, hand operated by wing nut on outside of case.

Lens—Spread or diffusing, convex, heat resisting lens can be furnished.

Adjustable Stops—Two simple adjustable stops are provided so that projector can be tipped completely over or turned around, or both, for relamping and cleaning, and then returned to the exact original setting.

The 1929 Line of Buss Lights

The 1929 line of Buss Lights include seven models with both metal and translucent shades. Bases in handsome Bronze, Ivory and Gun Metal finishes. The new translucent shades have the modern appeal. Widely different in design and color, they offer a range of choice for any taste, any use or any room.

Unlike an ordinary stand lamp, the Buss Light can be instantly converted into a clamp lamp or hang lamp. And both the bulb and the shade can be adjusted to focus the light wherever the reader wants it.

Buss Lights are popular sellers every season. They fill a definite need.

No. 3141

No. 2002

Net Prices to the Trade

Fancy (\$3.00 Retail) Buss Lights—Translucent or metal shade—packed 1 complete shade and base in a corrugated carton. Less than 12, \$2.10; 12 and over, \$2.00.

The Galahad Series

HERE are fixtures that will bring charm and distinction to any home. The latest and most exclusive lighting fixtures, yet in spirit as old as the legend of Sir Galahad. Each of the Galahad Series is individually beautiful, yet harmony of design prevails throughout the series.

Rarely does a new design prove so instantly popular as has the Galahad Series. Wherever shown, enthusiastic preference has been the result. Representing a period of design, an architecture and an art that has been always popular, the Galahad fixture will be a distinct asset to you in pleasing your customers. It offers something new—distinctive—yet with a foundation solid and substantial. Its

appeal is universal. It can rarely be used out of place. The complete Galahad line of suspended fixtures and wall brackets will beautify any home.

Made of cast bronze, decorated in rich, effective color. It is the fixture of choice where quality and beauty are demanded.

The irresistible appeal of that chivalric age, "in days of old, when knights were bold, and barons held their sway"—its moated castles, its turreted towers, its aged gray battlements—the England of King Arthur and Queen Guinevere—has been artistically interpreted for modern decoration in

the new series, GALAHAD. Show the Galahad Series liberally. Demonstrate its fitness for a wide range in sizes and styles of homes. Nothing you could show your customer is so sure to please both before and after its purchase. Building beauty into homes builds business for you.

New Eveready Portable Flasher

TO WARN AGAINST HIGHWAY HAZARDS

AUTOMATIC IN ACTION ECONOMICAL IN MAINTENANCE

Requires four standard Eveready Columbia 6" dry cells connected in series to deliver 6 volts. Extra 6-volt Eveready Mazda Lamp No. 1135 inside battery housing. Battery compartment constructed of seamless steel attractively finished in red. Top of flasher cadmium-plated for weather protection. Heavy Fresnel type red glass lens. Padlock for battery compartment with an extra long hasp so that the device can be chained. This flasher is of rugged construction throughout and entirely weatherproof.

This flasher is simple to use and therefore can be entrusted to unskilled laborers. It is powered by standard Eveready Columbia dry cells, which can be universally obtained for renewals.

HIGH IN VISIBILITY RUGGED IN CONSTRUCTION

This new Eveready Portable Flasher is designed primarily for traffic signal warnings where kerosene lanterns have been extensively used. It has, however, many other

possible uses in connection with both land and water traffic. Although the initial cost of the beacon is considerably more than that of an oil lantern its maintenance cost is so much less that, in the long run, it provides the most economical warning signal. Oil lanterns have proved to be generally unsatisfactory because of the fact they are not dependable, requiring the use of larger numbers than actually needed as warning signals. Furthermore, they require a great deal of attention, which at present day labor wage scales makes their maintenance expensive.

In addition to the considerable advantage in maintenance cost, the portable flasher has the distinct advantage of the flashing feature, which cannot be obtained with oil lanterns, and which is a much better warning signal than a steady burning light.

Operates Entirely on Dry Batteries

Auto Lamp Display and Stock Cabinet

The EVEREADY Cabinet is 23" high, 16" wide and 9" deep. There are two compartments, upper and lower. The upper tilting compartment stocks and displays in a very unique manner 100 assorted side, rear and instrument lamps. When closed it is flush with the front of the cabinet. The lower compartment, equipped with shelves and sliding doors, conveniently holds 12 unit cartons of assorted headlight lamps. By no other method can a dealer carry his stock so safely and compactly in the minimum protected space and at the same time remind the car owner that he needs lamps.

Red Seal and Eveready Batteries

The Size "A" is the standard cell. The most popular is the round carton, 2½x6½ inches, with screw binding posts.

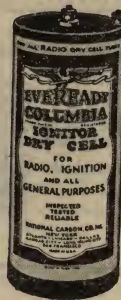

Red Seal is also furnished in a square carton—No. 2448, the same size, also with screw binding posts.

If desired, No. 2434, round carton, is made with standard spring clip connectors.

RED SEAL SPARKLERS AND COLUMBIA HOT SHOTS

Red Seal Sparker,
Steel Clad, 141

Columbia Steel Case
Hot Shot, No. 1461

Recommended for use where four or more dry cells are used in series. The container is made of heavy gauge steel, is moisture proof and will stand extra rough usage, shipping and handling.

Columbia, Red Seal Dry Cells, Red Seal Sparkers, and Columbia Hot Shots can be purchased on yearly contract basis. Write us regarding this special arrangement.

Prices on All Batteries Include Freight Allowance to Destination.

"H & H" Hegemite Plates — Schedule "H"

"Hegemite" is a phenol-resin plastic, exceptionally hard and strong—will not easily break and has high dielectric insulating properties. Positively cannot tarnish or corrode and is impervious to moisture and alkali.

The standard finish of "H&H" Hegemite Plates is the dark mahogany. Black "H&H" Hegemite Plates can be supplied on special order.

The polished bevel edges and artistic border design add beauty to the decorative effect.

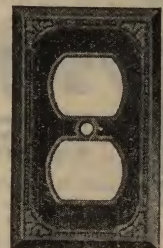

The main surface of the plate has very fine vertical lines. This presents a rich, attractive appearance. The back edge, which rests against the wall, is broad and flat, thus eliminating any possible chance of cut or torn wallpaper.

Anderson-Pitt Heaters

An Entirely New Principle in Heater Construction—No Wasted Heat

The Anderson-Pitt Heater is a scientific reflector which controls all the heat rays—not simply a bowl that scatters rays everywhere. All the heating element faces the reflector at the correct position to get complete reflection of the heat rays. Thus no current is wasted. All the electrical energy is converted into heat and evenly dispersed. May be had in either the low-base model illustrated or with adjustable high stand; both are easily adjustable to any angle.

ROTO-VERSO Electric Clothes Washer

**Built for Extra Safety for the Clothes
No Moving Parts Inside of Tub**

SAFE: All moving parts are entirely enclosed. All electric connections are thoroughly insulated. No moving parts inside the tub to wear or tear the clothes and even daintiest fabrics are washed as gently as by hand. Motor is protected by automatic safety switch which shuts off current if motor is overloaded. Wringer has simple safety release for tension on rolls.

EFFICIENT: The Roto-Verso has a new improved washing action distinctive from that of all other washers. As the tub rotates from left to right, the specially designed fin in the tub starts a surge of water by creating a series of waves which are thrown against one another, multiplying in force and action and forcing the hot suds through the clothes twice every second. It is silent, smooth and powerful and cleans everything from the sheerest garments to the heaviest blankets, thoroughly and quickly, wholly by water action. No torn clothes, lost buttons or nap cut from blankets. Positively harmless to clothes, curtains or bedding, no matter how long clothes are left in washer.

ATTRACTIVE IN APPEARANCE: Requiring little floor space, its neat appearance and its copper tub with high-grade pearl gray automobile lacquer enamel outside and nickel-plated inside, make it truly a woman's washer—one that will appeal to the modern housewife who wants to do the family washing under the sanitary conditions existing in her home.

Copper tub has no seams or corners to wear or tear the clothes. Outside finished in automobile gray lacquer, inside nickel-plated.

ALL ALUMINUM WRINGER: Sturdy, non-sagging, reversible type. Equipped with simple safety release which is within easy reach and quickly relieves the pressure on rolls when necessary.

Woman's Ideal Washer; Simple, Safe, Thorough

Made by the manufacturers of the Famous UNIVERSAL Household Helps which are known the world over for their high quality and lasting service.

Over all height, 50 $\frac{3}{4}$ ".

Floor space, 26" square.

Height to edge of tub, 34 $\frac{3}{4}$ ".

Total weight, 175 lbs.

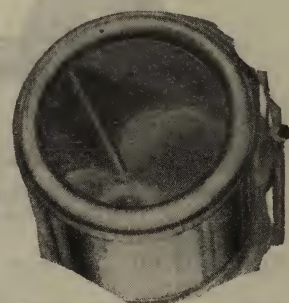

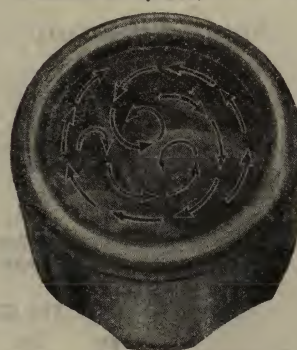

Weight crated, 235 lbs.

Size of tub, 21 $\frac{1}{2}$ " diameter x 17 $\frac{1}{2}$ " deep.

Capacity, 15 gal. of water and 7 lbs. dry clothes.

If alternating current is specified we must know frequency (number of cycles).

The FIN develops a unique washing action.

TOASTMASTER

Automatic Electric Toaster!
"FOR PERFECT TOAST"

The Toastmaster toasts the bread on both sides at once, just alike, an even golden brown.

You do not have to turn the bread, and you will not have to look for the best side to butter. The enclosed oven seals in the flavor, and the toast is piping, hot clear through, and the taste—you will be surprised at the difference.
